,	Basis of the report				
	With regard to the elements of the international application:*				
		the international application as originally filed.			
	X	e description, pages 1-5, as originally filed,			
		pages, filed with the demand,			
		pages , received on with the letter of			
	X	e claims, pages , as originally filed,			
		pages , as amended (together with any statement) under Article 19,			
		pages, filed with the demand,			
		pages 6, received on 3 December 2004 with the letter of 3 December 2004			
	X	ne drawings, pages 1/4 - 4/4, as originally filed,			
		pages, filed with the demand,			
		pages, received on with the letter of			
		ne sequence listing part of the description:			
		pages, as originally filed			
		pages, filed with the demand			
•		pages, received on with the letter of			
2.	With	gard to the language, all the elements marked above were available or furnished to this Authority in the language in he international application was filed, unless otherwise indicated under this item.			
	Which	lements were available or furnished to this Authority in the following language which is:			
		ne language of a translation furnished for the purposes of international search (under Rule 23.1(b)).			
	同	ne language of publication of the international application (under Rule 48.3(b)).			
		he language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2			
	Ш	nd/or 55.3).			
3.	With	gard to any nucleotide and/or amino acid sequence disclosed in the international application, the international			
•	pre	preliminary examination was carried out on the basis of the sequence listing:			
		contained in the international application in written form.			
		iled together with the international application in computer readable form.			
		urnished subsequently to this Authority in written form.			
		furnished subsequently to this Authority in computer readable form.			
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.			
		The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished			
4.		The amendments have resulted in the cancellation of:			
		the description, pages			
		the claims, Nos.			
		the drawings, sheets/fig.			
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to			
		go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**			
*	Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).				
**	* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report				

PCT/AU2003/001423

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	1. Statement				
	Novelty (N)	Claims 1-11	YES		
•		Claims	NO		
	Inventive step (IS)	Claims 1-11	YES		
	•	Claims	NO		
	Industrial applicability (IA)	Claims 1-11	YES		
		Claims	NO		

2. Citations and explanations (Rule 70.7)

Claims 1-11 meet the criteria set forth in PCT Articles 33(2)-(4) for novelty, inventive step and industrial applicability.

None of the citations discloses a recreational board travelling across a medium, said recreational board comprising: a board having a top surface and a bottom surface; said top surface supporting a user positioned on said recreational board; and said bottom surface contacting the medium on which the board travels; the board being shaped so that a front portion of the board is narrower than a rear portion of the board; wherein the bottom surface includes a plurality of grooves that extend forwardly from a central zone on said bottom surface to adjacent a side edge of the bottom surface. Therefore, the claims are novel.

It would not be obvious for a skilled addressee to arrive at the claimed arrangement from the teachings of the prior art.

The claims define subject matter that would be suitable for industrial application.
